#### **Summary**

I am a product manager obsessed with creating experiences users can't live without. At Microsoft, I'm driving adoption of Copilot AI subscriptions. Previously, I co-founded LiveGreen, growing it from a hackathon idea to 50,000+ active users. I am seeking opportunities to build AI products that solve real-world problems and delight users.

#### **Experience**

#### Microsoft

## **Product Manager 2**

2024 - Present

Leading the Copilot AI onboarding experience for new commercial users, focusing on personalized end-user communications to drive adoption and engagement.

#### **Product Manager**

2021-2024

Led Microsoft 365 experiences for new commercial users and cloud migration, resulting in 200,000+ companies joining Microsoft's fast-update cloud channel.

#### **Projects**

## LiveGreen, Daily Carbon Tracker

2018 - 2021

Co-founded and developed an iOS app that empowered 50,000+ active users to adopt sustainable habits, resulting in 80,000+ trees planted globally. Featured in Apple's 2019 Earth Day campaign.

## Forest Card, Green Banking App

2020

For my senior project, I launched a beta program for a debit card that planted trees using transactional fees and savings' interest rates. Developed in partnership with Galileo Financial Technologies.
